VICTAS

INTERNATIONAL TOP PLAYERS TRUST IN VICTAS QUALITY

Top players around the world rely on high-tech equipment made by VICTAS. Koki Niwa, Japanese national player and current No. 11 in the world ranking (May 2017), won the silver medal in the Olympic Games 2016 in Rio with the Japanese team and he also became vice world champion in team after his switch to VICTAS in 2016. The exceptionally gifted Japanese player Yuto Muramatsu, former world ranking No. 22 and one of the greatest talents in the world is on his way to become one of the best players worldwide. Also German national player Benedikt Duda improved quite significantly after his change to VICTAS to reach the Top 50 in the world ranking very quickly.

Since April 1st, 2017, VICTAS has also been the official sponsor of the Japanese men's national team. The ambitious men's team from Japan thus relies on the know-how of VICTAS for the next four years and will compete in the new VICTAS national wear at all major events (including the home Olympics in Tokyo 2020).

THE NEW GENERATION OF HIGH ENERGY TENSION OFFENSIVE RUBBERS!

V > 15 Extra

€ 46,90

The ultimate weapon for aggressive offensive players! V > 15 Extra is a high-end offensive rubber which will enable you to perform on a new level in topspin rallies. Feel the ultimate power and high-efficiency energy conversion of the innovative 47.5° offensive sponge and experience the unlimited potential of the spin-optimized top rubber sheet! Demanding offensive players who rely on aggressive topspins as well as topspin-to-topspin rallies will take their play to a new level with V > 15 Extra!

Ⓢ 118 Ⓞ 90
Ⓡ 110 Ⓜ 2,0 · Max. mm

V > 15 Limber

€ 46,90

The ultimate weapon for spin-oriented offensive players! V > 15 Limber is an elastic high-end offensive rubber with excellent spin features and catapult effect. Feel the power and elasticity of the soft 40° offensive sponge and experience the enormous spin potential of the innovative top rubber sheet! Modern offensive players who rely on spinny, variant-rich topspin play will enjoy a whole new dimension of opportunities with V > 15 Limber!

V > 01

V > 01 Limber

VICTAS sponge hardness – overview

- (S) 114 (C) 91
- (R) 105 (M) 1,8 · 2,0 · Max. mm

V > 01 € 44,90

The “Power & Balance” philosophy of the V > 01 rubber combines the power of topspin bombs with feel and precision, so that you remain in control at all times. This sensational feel is the result of the 47.5° sponge which provides for a more direct touch enabling precise placing of the ball. In hard-hit balls, the air chambers of the open-pore sponge are compressed, which results in longer ball contact. This virtually makes the V > 01 rubber explode, catapulting the ball to your opponent’s side at maximum speed.

- (S) 110 (C) 93
- (R) 107 (M) 1,8 · 2,0 · Max. mm

V > 01 Limber € 44,90

V > 01 Limber is the softer variant of the VICTAS V > 01 premium series. The German and Japanese material experts (GJ Tec) combined the extremely spinny and fast High Energy Tension rubber sheet of V > 01 with a state-of-the-art medium sponge with great catapult effect. The result is a highly-elastic offensive rubber which does not fall short of the other V > 01 versions as regards power and spin. The “Power & Balance” concept was optimized such that the softer sponge design of V > 01 enables higher ball trajectories, which significantly increases forgiveness in less-than-perfect top-spin strokes.

- (S) 112 (C) 91
- (R) 107 (M) 1,8 · 2,0 · Max. mm

V > 01 Stiff € 44,90

V > 01 Stiff is another innovation of the VICTAS V > 01 premium series. The pimple geometry as well as the maximum tension of the High Energy Tension rubber sheet of V > 01 Stiff provide for excellent energy transfer when the bat hits the ball. The open-pore 45° high-performance sponge which is slightly softer than in V > 01 provides for more control in your topspin play. With this new sponge / top rubber sheet combination, V > 01 Stiff enables extremely fast and spinny topspin strokes with an aggressive ball trajectory. Especially in mid-distance top-spin rallies, the V > 01 Stiff rubber unfolds its full potential.

VS > 402 Double Extra

€ 42,90

The VS > 402 Double Extra is a further development of the very popular VS > 401. This innovation combines the very tacky, elastic top rubber sheet with a modern, slightly harder offensive sponge. The new sponge/top rubber sheet combination makes this High Energy Tension rub-

ber the ideal weapon for any spin-oriented allrounder. The tacky and flexible top rubber sheet virtually tacks the ball and produces fantastic spin both in topspin play and in defensive strokes with heavy backspin.

(S) 96 (C) 101 (R) 105 (T) 1,8 · 2,0 · Max. mm

VS > 402 Limber

€ 42,90

The VS > 402 Limber is the softest variant of the tacky VICTAS VS series. The tacky, elastic top rubber sheet was combined with the high-catapult Limber offensive sponge. This sponge/top rubber sheet combination produces tons of spin and creates countless opportu-

nities for flexible all-round table tennis players. With the highly tacky top rubber sheet you can put pressure on your opponents with dangerous serve/return variants and spinny topspin/backspin strokes.

(S) 92 (C) 103 (R) 105 (T) 1,8 · 2,0 · Max. mm

VS > 401

€ 42,90

VICTAS V > 401 offers the perfect balance between a tacky control rubber and a variable offensive rubber. The German and Japanese material experts (GJ Tec) developed an extremely tacky surface for vicious backspin forcing your opponent into mistakes. The

slightly more compact sponge neutralizes your opponent's attacks, thus providing for fantastic control. The High Energy Tension top rubber sheet also offers sufficient speed for sudden and dangerous attacks.

(S) 86 (C) 105 (R) 105 (T) 1,5 · 1,8 · 2,0 mm

VO > 102

€ 39,90

The VO > 102 rubber is one of the latest innovations made by VICTAS. The pimple geometry was optimized in a way that will enable you to create your own effective spin variations. The new pips design will also provide for direct ball feedback and excellent control. With the com-

bination of an elastic sponge and High Energy Tension Technology, VO > 102 offers playing characteristics that will be an inspiration even for absolute top players.

(S) 106 (C) 87 (R) 90 (T) 1,8 · 2,0 · Max. mm

VO > 101

€ 39,90

The new VO > 101 is a very fast and dangerous short pips-out rubber. Based on our many years of experience, we designed a high-tech rubber which leaves nothing to be desired for aggressive pips-out attackers. The new rubber sheet with optimized pips geometry produces a

great pips-out effect. The elastic sponge combined with our High Energy Tension Technology opens up new dimensions of speed development in the pips-out segment.

(S) 108 (C) 86 (R) 88 (T) 1,6 · 1,8 · 2,0 · Max. mm

VLB > 301

€ 39,90

The VLB > 301 is a soft High Energy Tension pips-out rubber made by VICTAS. The special geometry of the pimples designed by our Japanese pips-out experts (GJ Tec) enables the player to produce effective and dangerous topspin variations. The ultra-soft sponge

combined with High Energy Tension Technology produces a high trajectory of the ball and fantastic sound.

(S) 88 (C) 95 (R) 87 (T) 1,6 · 1,8 · 2,0 · Max. mm

HIGH-TECH CARBON – MADE BY VICTAS

V-CARBON

One of the hardest synthetic fibres in the world, ideal for uncompromising offensive blades producing tons of power.

LINE CARBON

Very light non-woven carbon fibre for great flexibility and speed at low weight.

ARAMID CARBON

Combination of elastic aramid and tough carbon fibres. Develops great speed, aramid provides for good feel.

SILVER CARBON

Combination of carbon and aluminium fibres. Combines great feel with power.

CARBON

Lightweight and stable material often used in aircraft design. Develops great speed – ideal for direct attacks.

FLEECE CARBON

Non-woven carbon layer. More speed with good control.

Yuto Muramatsu **NEW**

€ 119,90

The Japanese shooting star Yuto Muramatsu was a key contributor to the development of this high-end blade. It is a fast DEF blade offering modern defenders, in addition to great reliability in defense, all they need to create their own sudden counter-attacks. The special White Mahogany outer ply of the 5-ply design harmonizes perfectly with Yuto's OFF power, while the VICTAS design team was also able to improve defense control and precision even further. Yuto Muramatsu is a VICTAS quality product "Made in Japan".

Koki Niwa **NEW**

€ 159,90

This fine offensive blade is the perfect equipment for creative, close-to-the-table power table tennis. The innovative DSE Blade Technology featuring the two built-in synthetic High-Tech fibres optimize energy transfer into the ball. This feature enables risky counter-topspins with an aggressive trajectory and extreme spin variations in serve-and-return situations. The reinforced core ply combined with the power of the inner aramid carbon fibre is just perfect for fast mid-distance topspin rallies with optimized stability in extreme situations. The outer, very elastic Fleece Carbon provides for excellent feel and great spin development.

QUARTET

Perfect harmony thanks to combination of 4 synthetic fibres

Quartet VFC

€ 129,90

In the development of Quartet VFC, the VICTAS material experts aimed at designing the perfect offensive blade. With V-Carbon, one of the hardest and toughest fibres in the world, Quartet VFC features enormous power and stability for ultimate precision even in the most difficult situations. This precision is perfectly complemented by the elasticity and spin potential of the outer Fleece Carbon layer. Enjoy unrivalled precision in passive playing situations and unlimited offensive creativity with the new Quartet VFC.

Quartet LFC

€ 89,90

VICTAS Quartet LFC is a very light blade with great feel for modern offensive players. By using the highly flexible Line Carbon synthetic fibre, the VICTAS designers were able to reduce the overall weight and thickness of Quartet LFC to approx. 86g and 5.3 mm, respectively. This optimized DSE design provides for great handling performance, giving any offensive player everything they need to take their play to a new level.

Double Synergy Effect

Two synthetic fibres are used per side taking the blade to perfection.

SFC	SILVER CARBON	×	FLEECE CARBON
AFC	ARAMID CARBON	×	FLEECE CARBON

Quartet SFC

€ 89,90

VICTAS Quartet SFC distinguishes itself by its great feel and spin development. The ply structure of Quartet SFC was designed to provide spin-oriented offensive players with optimum ball contact feedback for precisely placed shots. The Silver Carbon layer on the core ply offers excellent speed development, while the softer Fleece Carbon provides strategic attackers with all the flexibility and feel they need.

Ⓢ 97 Ⓢ 93 Ⓢ ca. 92 g Ⓢ FL · ST

Quartet AFC

€ 119,90

VICTAS Quartet AFC is a fast, high-quality offensive blade featuring excellent control thanks to well-balanced DSE technology. An Aramid Carbon layer, a combination of elastic aramid and tough carbon fibres, is applied directly on the core ply of the Quartet AFC blade and provides for extra speed and stability. The outer Fleece Carbon layer increases the blade's spin potential and will give you an extraordinary level of control which you will hardly find in any other blade in this speed class. Take your offensive play to a new level with the power and vigour of Quartet AFC.

ファイヤーフォール

Fire Fall

Dynamic Core Effect

All blades of the brand-new VICTAS Fire Fall series were developed based on the "Dynamic Core Effect" system: 5 carefully chosen wooden plies are combined with High-Tech fibre material placed directly on the plywood core, bringing together the speed of carbon fibre and the great feel of classic all-wood blades. The Ayous core of the Fire Fall blades is combined with an elastic and stable synthetic fibre (e.g. aramid-carbon). This is why VICTAS Fire Fall blades have more feel than other carbon blades in the OFF segment, without lacking the advantages of synthetic fibre materials [high stability, more speed]. The Fire Fall series, like all other blades of the VICTAS brand, is distinguished by uncompromising premium workmanship.

Fire Fall VC

€ 129,90

The Fire Fall VC is a High-Tech product featuring innovative, aerospace-tested carbon technology. In the development of the new high-end blade from the Fire Fall series, the VICTAS material experts aimed at designing the ultimate combination of speed development and control. V-Carbon, one of the hardest and sturdiest carbon fibers in the world, offers exactly these properties. Thanks to this high-tech fiber, the blade has excellent stability, which greatly improves control in extreme situations. With the hardness and power of the V-Carbon fiber combined with five fine wood plies, the Fire Fall VC provides for outstanding acceleration for unlimited creativity and vigor in offensive play. The Fire Fall VC is a real milestone in the field of blade design!

Fire Fall LC

€ 89,90

With the Fire Fall LC, VICTAS presents a new member of the Fire Fall family. The 7-ply structure of this offensive blade is based on the popular Fire Fall SC. Thanks to the new, even lighter and faster synthetic Line Carbon fiber, the overall weight of the blade is just about 85g. The Fire Fall LC combines perfectly balanced playing features, light weight and great speed. The blade offers enormous spin potential in topspin play. The Fire Fall LC is the first choice of any technically skilled offensive player who rely on modern attacking and put pressure on their opponents with dangerous topspin play.

Fire Fall AC

€ 89,90

The Fire Fall AC is the fastest blade of the VICTAS Fire Fall series. The high-quality aramid-carbon fibre which is placed directly on the plywood core provides this innovative offensive blade with a larger sweet spot and fantastic attacking speed. The combination of five carefully selected wooden plies with the stability and elasticity of aramid-carbon fibre make the Fire Fall AC a well-balanced blade which will inspire any modern offensive player. The direct touch enables high-precision spinny strokes, and in passive play, the VICTAS Fire Fall AC provides for consistent bouncing of the ball and low vibration. We are sure that you will love the second-to-none workmanship and noble design of this premium blade.

Blade profile

(S) 104 (C) 87 (i) ca. 88 g (A) FL · ST · AN

Fire Fall FC

€ 89,90

Fire Fall FC is the blade of the VICTAS Fire Fall series with the greatest feel. The well-balanced ply composition and the soft Fleece Carbon Fiber material of this OFF- blade which is placed directly on the plywood core provide for excellent, controlled feel in all playing situations. This premium-workmanship offensive blade produces high speed and enables a higher ball trajectory at the same time. In serve/return as well as blocking/counter-attack situations, the Fire Fall FC is distinguished by a magnificent feel and unique touch. A controlled offensive blade which will be hard to resist.

Blade profile

(S) 96 (C) 92 (i) ca. 82 g (A) FL · ST

Fire Fall SC

€ 89,90

The Fire Fall SC is a perfectly balanced offensive blade for modern attackers. Silver Carbon, a combination of elastic and stable carbon and aluminium fibres chosen by the VICTAS material experts, perfectly complements the 5-ply composition of the Fire Fall SC to form a true premium offensive blade. Fire Fall SC is made especially for variant-rich and fast mid-distance topspin and counter-topspin. This is where it shows its full potential. In serve/return and in over-the-table play, the blade provides for excellent feedback and feel. An offensive blade leaving nothing to be desired for any modern offensive player.

Innovative high-end product with Fleece Carbon for modern defenders

Koji Matsushita Special € 109,90

The new Koji Matsushita Special made by VICTAS combines innovative engineering with the experience and passion of the legendary Japanese defender, Koji Matsushita. This high-end product is the ideal tool for top players relying on modern, uncompromising, close-to-the table defending. Almost zero-vibration bouncing thanks to Fleece Carbon providing great advantages: Optimum control in difficult situations thanks to large sweet spot and excellent speed potential for own attacks. The aggressive trajectory and high precision of your defense will put permanent pressure on your opponent.

Ⓢ 78 Ⓢ 99 Ⓢ ca. 90 g Ⓢ FL · ST

The defensive blade designed by Japanese table tennis legend Koji Matsushita

Koji Matsushita € 79,90

The VICTAS Koji Matsushita is the premium product among defensive blades. Koji Matsushita, 4-times Olympic competitor and one of the world's foremost defenders, and the VICTAS team designed a defensive blade which has everything modern defensive strategists need. The perfectly adjusted, 5-ply structure made of carefully selected veneers (including high-quality Japanese cedar fir) provides for great control in away-from-the-table defensive play and in passive above-the-table play. Plus, the VICTAS Koji Matsushita produces enough power for successful attacking. Modern defenders who not only rely on their defensive qualities, but use every opportunity to attack, will be inspired by the VICTAS Koji Matsushita. Each of these outstanding blades is created individually in a complex manufacturing process - hand-made in Japan.

Ⓢ 74 Ⓢ 99 Ⓢ ca. 90 g Ⓢ FL · ST

Fast defensive blade with astounding vigor for aggressive defenders

Koji Matsushita Offensive € 99,90

Modern defenders like the great Japanese talent, Yuto Muramatsu, will take every opportunity to launch sudden counter-attacks from a safe defensive position. The Koji Matsushita Offensive is the ideal blade for this type of players who rely on excellent control for defensive playing, but need good speed for their own attacking. The 5-ply design with a slightly harder outer mahogany ply provides for outstanding power second-to-none in the defensive blade segment, and gives any defender all the precision and control they need for passive playing. All blades of the VICTAS Koji Matsushita series are hand-made in our Japanese blade workshop.

High-quality defensive blade made in Japan for excellent balance and control

Koji Matsushita Defensive € 99,90

Koji Matsushita Defensive is a premium-quality, Japanese defensive blade with excellent control features. Thanks to the especially thin, 5-ply structure, the VICTAS material experts succeeded in reducing the overall weight of the Koji Matsushita Defensive to just 85g, giving the blade outstanding balance and lightness. The "Silver Heart" outer ply absorbs the speed of your opponent's attacks providing you with great feel and ball control. All blades of the VICTAS Koji Matsushita series are hand-made in our Japanese blade workshop.
